

# Balaam and the Talking Donkey

## Foot print craft

Trace each child's footprint.

Stack three pieces of construction paper on top of each other and cut out three footprints for each child.

For the ears, switch the left and right feet so that both feet are pointing outwards.

Lay the 3<sup>rd</sup> footprint on top of the two ears. This will be the donkey's face.

Glue the pieces together.

Add googly eyes, pom poms for the nose, and a paper tongue.

To hang your craft, punch two holes in the ears and attach a string.
